## Introduction

Welcome to the third edition of *Profiles of Michigan—Facts, Figures & Statistics for 2,024 Populated Places in Michigan*. As with the other titles in our *State Profiles* series, we built this work using content from Grey House Publishing's award-winning *Profiles of America*—a 4-volume compilation of data on more than 42,000 places in the United States. We have updated and included the Michigan chapter from *Profiles of America*, and added entire fresh chapters of demographic information and ranking sections, so that *Profiles of Michigan* is the most comprehensive portrait of the state of Michigan ever published.

This third edition provides data on all populated communities and counties in the state of Michigan for which the US Census provides individual statistics. It includes seven major sections that cover everything from **Education** to **Ethnic Backgrounds** to **Climate**. All sections include **Comparative Statistics** or **Rankings**, and full-color **Maps** at the back of the book provide valuable information in a quickly processed, visual format. Here's an overview of each section:

### 1. Profiles

This section, organized by county, gives detailed profiles of 2,024 places plus 83 counties. Based on core Census data, these numbers reflect extensive updates from the U.S. Census Bureau's American Community Survey, and Nielsen Claritas, a trusted source for up-to-date demographic information. In addition, we have added current government statistics and original research, so that these profiles pull together statistical and descriptive information on every Census-recognized place in the state. Major fields of information include:

|                  |                       |                   |                 |
|------------------|-----------------------|-------------------|-----------------|
| <i>Geography</i> | <i>Housing</i>        | <i>Education</i>  | <i>Religion</i> |
| <i>Ancestry</i>  | <i>Transportation</i> | <i>Population</i> | <i>Climate</i>  |
| <i>Economy</i>   | <i>Industry</i>       | <i>Health</i>     |                 |

In addition to place profiles, this section includes an **Alphabetical Place Index** and **Comparative Statistics** that compare Michigan's 100 largest communities by dozens of data points.

### 2. Education

This section begins with an **Educational State Profile**, summarizing number of schools, students, diplomas granted and educational dollars spent. Following the state profile are **School District Rankings** on 16 topics ranging from *Teacher/Student Ratios* to *High School Drop-Out Rates*. Following these rankings are statewide *National Assessment of Educational Progress (NAEP)* results and data from the *Michigan Educational Assessment Program (MEAP)*—an overview of student performance by subject, including easy-to-read charts and graphs.

### 3. Ancestry

This section provides a detailed look at the ancestral and racial makeup of Michigan. 217 ethnic categories are ranked three ways: 1) by number, based on all places regardless of population; 2) by percent, based on all places regardless of population; 3) by percent, based on places with populations of 10,000 or more. You will discover, for example, that Sault Ste. Marie has the greatest number of *Chippewa Indians* in the state (2,257), and that 17.7% of the population of Dearborn are of *Lebanese* ancestry.

### 4. Hispanic Population

This section defines Michigan's Hispanic population by 23 Hispanic backgrounds from *Argentinian* to *Venezuelan*. It ranks each of 15 categories, from Median Age to Median Home Value, by each Hispanic background. For example, you'll see that Lansing has the highest percentage of *Puerto Ricans* who speak English-only at home (58.7%), and that Ann Arbor has the highest percentage of *Mexicans* who are four-year college graduates (61.6%).

### 5. Asian Population

Similar in format to the section on Hispanic Population, this section defines Michigan's Asian population by 21 Asian backgrounds from *Bangladeshi* to *Vietnamese*. It ranks each of 14 categories, from Median Age to Median Home Value, by each Asian background. You will learn that *Koreans* in Bloomfield have a median household income of \$132,124 and that 100.0% of *Filipinos* in Canton are high-school graduates.

## 6. Climate

This important topic has been greatly expanded and updated since the last edition. Each state chapter includes a State Summary, two new maps—weather stations and a relief map—and profiles of both National and Cooperative Weather Stations. In addition, you'll find Weather Station Rankings with hundreds of interesting details, such as Stambaugh 2 SSE and Stephenson 8 WNW reporting the lowest annual extreme minimum temperatures (-45° F).

These sections also include Significant Storm Event data from January 2000 through December 2009. Here you will learn that an ice storm caused \$161 million in property damage in Southeast Lower Michigan in April 2003 and that a F2 tornado was responsible for two deaths in Ingham County in October 2007.

## 7. Maps

For a more visual point of view, there are 16 full-color maps of Michigan at the back of the book. They provide information on topics such as *Federal Lands and Indian Reservations*, *Core-Based Statistical Areas and Counties*, *Hazard Events*, *Population Demographics*, *Median Age*, *Income*, *Median Home Values*, *Educational Attainment*, *Congressional Districts*, and the *2008 Presidential Election*.

Note: The extensive **User's Guide** that follows this Introduction is segmented into six sections and examines, in some detail, each data field in the individual profiles and comparative sections for all chapters. It provides sources for all data points and statistical definitions as necessary.

# User's Guide: Ancestry

## Places Covered

The ranking tables are based on **1,852 places** in Michigan. Places include 534 municipalities, 1,233 minor civil divisions and 84 census designated places (CDP). The U.S. Bureau of the Census defines a CDP as “a statistical entity, defined for each decennial census according to Census Bureau guidelines, comprising a densely settled concentration of population that is not within an incorporated place, but is locally identified by a name. CDPs are delineated cooperatively by state and local officials and the Census Bureau, following Census Bureau guidelines. Beginning with Census 2000 there are no size limits.”

## Source of Data

The ancestries shown in this chapter were compiled from three different sections of the 2000 Census: Race; Hispanic Origin; and Ancestry. While the ancestries are sorted alphabetically for ease-of-use, it's important to note the origin of each piece of data. Data for Race and Hispanic Origin was taken from Summary File 1 (SF1) while Ancestry data was taken from Summary File 3 (SF3). The distinction is important because SF1 contains the 100-percent data, which is the information compiled from the questions asked of all people and about every housing unit. SF3 was compiled from a sample of approximately 19 million housing units (about 1 in 6 households) that received the Census 2000 long-form questionnaire.

## Ancestries Based on Race

The data on race were derived from answers to the question on race that was asked of all people. The concept of race, as used by the Census Bureau, reflects self-identification by people according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national-origin groups.

If an individual did not provide a race response, the race or races of the householder or other household members were assigned using specific rules of precedence of household relationship. For example, if race was missing for a natural-born child in the household, then either the race or races of the householder, another natural-born child, or the spouse of the householder were assigned. If race was not reported for anyone in the household, the race or races of a householder in a previously processed household were assigned.
