The Directory of Independent Ambulatory Care Centers

“Medical professionals and patients will welcome Grey House’s addition to its outstanding line of health care directories. This volume bridges a gap in health care directories by bringing together into one comprehensive listing those centers and clinics that focus on diagnostic imaging tests, outpatient surgical procedures, or specialties such as pain management and sleep disorders... Regardless of format, it should be widely used by health professionals, medical libraries and public libraries with sizable health care collections.”

-Booklist

“... Among the numerous hospital directories, no other provides information on independent ambulatory centers. A handy, well-organized resource that would be useful in medical center libraries and public libraries.”
