447,799 | Total Number of Diabetics (Overall)

Governor Jan Brewer
State Capitol, 1700 West Washington
Phoenix, Arizona 85007
<http://www.governor.state.az.us/>

In Arizona, there were 447,799 people with diabetes in 2011. In this state, the overall prevalence of diabetes is 9.40%, below the National Average of 9.52%. Arizona ranks 24th in the country among all states and US territories for the prevalence of diabetes. In addition, in Arizona, 10.55% of the people with diabetes do not have any health insurance at all, above the National Average of 10.12%.

In Arizona, out of every 100 people with diabetes there are approximately 34 Hospitalizations and 58 ER visits annually (compared to the National Average of 35 and 57, respectively). Moreover, the annual cost of medical care for diabetics (including hospitalizations) in this state is \$12,342 (compared to the National Average of \$12,237).

Finally, in Arizona, many diabetics have not achieved proper control of the disease as shown by the fact that 43.81% of diabetics have HbA1c levels above 7.

A breakdown of these and other diabetes statistics for Arizona, by demographic group, including gender, race/ethnicity and age, is contained below.

In the 5th Congressional District, Arizona, there were 37,802 people with diabetes in 2011. In this district, the overall prevalence of diabetes is 7.92%, below the National Average of 9.52%. This district ranks 360th in the country among all congressional districts for the prevalence of diabetes. In addition, in this district, 8.45% of the people with diabetes do not have any health insurance at all, below the National Average of 10.12%.

In the 5th Congressional District, Arizona, out of every 100 people with diabetes there are approximately 31 Hospitalizations and 51 ER visits annually (compared to the National Average of 35 and 57, respectively). Moreover, the annual cost of medical care for diabetics (including hospitalizations) in this district is \$12,010 (compared to the National Average of \$12,237).

Finally, in the 5th Congressional District, Arizona, many diabetics have not achieved proper control of the disease as shown by the fact that 43.45% of diabetics have HbA1c levels above 7.

A breakdown of these and other diabetes statistics for the 5th Congressional District, Arizona, by demographic group, including gender, race/ethnicity and age, is contained below.
