

RECENT REVIEWS

The Complete Mental Health Directory

“Touted as ‘a comprehensive source book for individuals and professionals,’ this directory is a thorough, well-organized resource for information on all aspects of mental health ... An authoritative, comprehensive tool for any reference desk, this valuable resource is highly recommended.”

–*Library Journal*

“...provides a comprehensive access point to mental health information for a wide spectrum of users. With sections covering individual disorders, associations and organizations, and government agencies, this resource would be useful to the beginning researcher or the interested public. The inclusion of sections devoted to resources for professionals, clinical management, and pharmaceutical companies makes this a good tool for those in the mental health, social services, psychological, and health care fields as well...this edition provides information useful for public, academic, and professional collections.”

–*ARBA*

“This...volume...provide[s] a great deal of easily accessed, well organized information...This book could be easily used by a wide range of people: mental health consumers, clinicians, social workers, and case managers...This is a good resource book for professionals and for consumers...”

– *Doody’s Book Reviews*

“The strength of this directory is that it consolidates widely dispersed information into a single volume. Public libraries and libraries specializing in health information would find this a useful purchase.”

–*Booklist*

“...Written for psychiatric professionals as well as patients and their families, this directory describes disorders and lists books, web sites, associations, support groups, companies involved with accreditation, government agencies, pharmaceutical companies, and research centers... Valuable for any hospital, academic, or public library.”

–*Choice*

“This directory would be useful to libraries providing consumer health information and as a basic reference tool for medical libraries. It would also be valuable to professionals and patients to help them become better educated about categorical diagnoses, symptoms, and treatments.”

–*Journal of Consumer Health on the Internet*
