Profiles of ... Series

“...The publisher has provided an organized and broad spectrum of information on New Jersey in one convenient volume.”

- ARBA

“*Profiles of Florida* is a comprehensive portrait of the economic and social condition of this state. This volume includes countless facts, figures, statistics, and beautiful color maps...The book includes a wide variety of data including answers to frequently asked demographic and economic questions...This is an excellent reference tool for all types of libraries.”

- *Journal of Business & Finance Librarianship*

“...The list of reference publications appended at the end of this volume is of interest by itself...the data provided reveal potential markets, social dynamics, and economic opportunities. They highlight the many aspects of Massachusetts’ attractiveness. The volume is recommended for all public and university libraries.”

- ARBA

“*Profiles of Michigan* is a useful reference...There is an excellent user guide and introduction at the beginning of the book, which is helpful in adding more depth and detail to the short profiles found for each populated place. By far the best feature of this reference tool is the comparative statistics section...I would recommend this book to a public library or school library to purchase as it is well organized, well researched, informative, and would be a good addition to a quick reference collection”

- ARBA

“...This book is a compact source of a tremendous amount of statistical data on Ohio, combining population statistics with up-to-date statistics on education. It should be in every Ohio library.”

- ARBA

“Highly recommended. New York libraries and comprehensive government collections supporting all levels of users.”

“...Altogether, this reference work incorporates a vast wealth of information about Pennsylvania and its citizens; it is well organized and in some sections effectively illustrated. It would certainly seem to be an essential acquisition for all Pennsylvania libraries...”

-ARBA

“Building upon the concepts from *Profiles of America*, the statistics in this work are arranged in sections, not chapters. The largest section contains the profiles of 1,784 populated places and 254 counties in Texas, including geography, housing, education, religion, ancestry, transportation, population, weather, economy, industry, and health. The statistics are based on the 2000 Census and ‘updated until nearly 80% of the profiles contain 2004 numbers.’ ...The end of the section includes an index to the populated places.

Another section covers education...The school districts are ranked on 16 different criteria...Several sections cover specific ethnic populations...*Profiles of Texas* is highly recommended for all libraries in the state.”
