**Grey House Publishing announces the Third Edition of  
Special Education: A Reference Book for Policy  
and Curriculum Development**

This third edition of *Special Education: A Reference Book for Policy and Curriculum Development* is the second published by Grey House Publishing. This new edition includes all the latest legal news, advocacy research, technical innovations and medical advancements that affect students, parents, teachers and health professionals in the special education community, as well as brand new elements.

This new edition includes 11 chapters, two more than the last edition. The detailed Table of Contents is your road map to the wealth of material in this work, whose scope is far reaching. All chapters have been reviewed and revised. Chapter 1 is a detailed, general overview of the field that discusses the changes in special education and what we can expect from special education in the future.

Following the overview, Chapter 2 is a chronology of special education, with specific information about relevant court cases, law and Federal acts from 1791 to today.

Chapters 3,4,5 and 6 each focuses on a specific topic as it relates to special education – curriculum, the law, politics, and popular culture and advocacy (a NEW section). Written in easy-to-understand, these in depth chapters offer valuable information that includes specific examples and a variety of quotes and citations that support the material. The chapter on popular culture sheds new light on how disability is handled in TV shows, films and literature.

Chapters 7, 8, and 9 offer valuable resources for all those involved in special education, whether student, parent, teacher, or medical professional. Here is where you will find organizations, associations, agencies, print and non-print resources that will help the reader do more focused research.

– continued –

Chapter 10 includes a wide variety of original documents, including book excerpts, articles, poems, and quotations that offer a unique look at how society views disability and special education.

The final section, Chapter 11, provides national statistics, many by state, on special education programs and progress.

In addition to the body of work which is amply enhanced by charts and images throughout, *Special Education: A Reference Book for Policy and Curriculum Development* includes a comprehensive Glossary and Subject Index. An informative Introduction by the author follows the Publisher's Note.

The invaluable information in this directory will prove itself to any educator, mentor, and parent requiring the important facts and details of working with children with special needs.

### **Free Online Access**
